- 2.3 Vital Signs
- 2.4 Procedures
- 2.5 Prescriptions
- 2.6 Imaging & Lab Orders
- 2.7 Completing a Visit

3. [Section 3: Manager Guide](#)

- 3.1 Dashboard Overview
- 3.2 Reports & Analytics
- 3.3 Financial Management
- 3.4 Staff Management
- 3.5 System Settings & Audit

4. [Appendix](#)

- A: Status Flow Diagrams

Section 1: Reception Guide

This section covers all front-desk tasks: registering patients, scheduling appointments, checking patients in, and collecting payments.

1.1 Patient Registration

Navigation: Sidebar → **Patients** → Click **"New Patient"**

The **"Register New Patient"** modal contains three sections:

Personal Information

Field	Required	Notes
First Name	Yes	e.g., "John"
Last Name	Yes	e.g., "Doe"
Age (years)	Yes	Must be 0–120
Phone Number	Yes	e.g., "+256 700 000 000"
Gender	Yes	Male / Female
City	No	e.g., "Kampala"
Address	No	Street address
Previous Card / File No.	No	For legacy card migration

Medical History

Field	Notes
Allergies	Comma-separated, e.g., "Penicillin, Aspirin"
Medical Conditions	e.g., "Diabetes, Hypertension"

Emergency Contact

Field	Notes
Contact Name	e.g., "Jane Doe"
Contact Phone	e.g., "+256 700 000 001"
Relationship	Spouse / Parent / Child / Sibling / Friend / Other

After submission: System auto-generates a patient code (`PAT-YY-NNNN`). The patient appears in the patient list immediately.

To edit: Click the patient's row → click **"Edit"** pencil icon.

Active/Inactive: Patients can be marked inactive via their detail page. Inactive patients are hidden from most searches by default.

Patient List Screen

- **Search:** by name, patient code, or phone number
- **Filters:** Gender dropdown, registration date range
- **Columns:** #, Patient, Contact, Gender, D.O.B / Age, Registered, Card No., Visits, Actions
- **Bulk actions:** None currently — each patient is managed individually.

1.2 Booking Appointments

Navigation: Sidebar → **Appointments** → Click **"New"**

The **"Book New Appointment"** modal:

Step	Field	Details
1	Select Patient	Search by name, code, or phone
2	Dentist	Dropdown of all available dentists
3	Appointment Type	Regular Checkup, Cleaning, Filling, Extraction, Root Canal, Crown, Implant, Orthodontic, Emergency, Consultation
4	Duration	15 / 20 / 30 / 45 / 60 / 90 / 120 minutes
5	Walk-in	Check if patient arrived without prior booking
6	Date	Date picker

Step	Field	Details
7	Time	Time picker (slots shown based on dentist schedule)
8	Chief Complaint	Brief reason for visit
9	Additional Notes	Any extra information

Calendar view: Toggle between **day** and **week** view. Appointments are colour-coded by dentist. Use the **"Today"** button to jump to the current date.

Walk-in appointments: Toggle the "Walk-in" checkbox when a patient arrives without a prior booking. The system will find the next available slot.

Appointment Statuses

Status	Meaning
Draft	Unsaved placeholder, not yet confirmed
Scheduled	Booked, awaiting confirmation
Confirmed	Confirmed by reception
Arrived	Patient checked in at front desk
In Progress	Dentist has started the visit
Completed	Visit finished
Cancelled	Appointment cancelled
No Show	Patient did not arrive
Rescheduled	Moved to a different time

1.3 Managing Appointments

Appointment Drawer

Click any appointment on the calendar to open the **appointment drawer** (slide-out panel). It shows:

- Patient info (name, code, gender, phone, age)

- Time & Dentist
- Appointment Type
- Chief Complaint
- Active Visit link (if visit started)
- Notes

Context-sensitive actions

Current Status	Available Actions
Scheduled / Rescheduled	Confirm Appointment , Cancel
Confirmed / Scheduled / Rescheduled	Patient Arrived (check-in), Cancel
Arrived (no visit yet)	Start Visit
Arrived / In Progress (has visit)	Continue Visit
Any cancellable status	Cancel Appointment (prompts for reason)

Editing an Appointment

Click the **Edit** pencil icon in the drawer to open the "**Edit Appointment**" modal. You can change dentist, type, date, time, duration, and notes. The patient field is locked once set.

Draft Appointments

Access via **Appointments** → **Draft Appointments** in the sidebar. Drafts are unconfirmed placeholders that do not affect the dentist's schedule.

1.4 Patient Check-in

When a patient arrives at the clinic:

1. Find their appointment in the calendar or search the appointment list
2. Click the appointment to open the drawer
3. Click "**Patient Arrived**"
 - Appointment status changes to "**ARRIVED**"
 - The system records `actualStartAt` timestamp
 - A real-time notification is sent to the dentist's dashboard

4. If no appointment exists, create a **Walk-in** appointment first

After check-in: The dentist will see the patient on their visit list. No further reception action is needed until check-out/payment.

1.5 Payment Collection

At check-out, the receptionist handles billing.

Navigation: Go to the visit → click the "**Bills**" icon, or navigate through **Invoices & Receipts** → **Invoices**.

Steps

1. Open the patient's invoice (status should be **Posted** — blue badge)
2. Click "**Receive {amount}**" (green button)

Record Payment Receipt Dialog

Field	Details
Payment Amount	Enter the amount being paid
Currency	UGX (default) or USD
Payment Method	Cash, MTN Mobile Money, Airtel Money, Visa Card, Mastercard, Bank Transfer, Cheque
Transaction Reference	Optional — e.g., TXN-2024-XYZ, Check #1234
Received By	Auto-filled with your name

Partial payments are supported. The invoice status will update to **Partially Paid** (amber badge) until the balance is cleared.

Payment Methods explained:

Method	When to use
Cash	Physical cash payment
MTN Mobile Money	Mobile money transfer via MTN

Method	When to use
Airtel Money	Mobile money transfer via Airtel
Visa Card / Mastercard	Card payments at POS terminal
Bank Transfer	Direct bank deposit or transfer
Cheque	Physical or digital cheque

Receipts

After payment, a receipt is auto-generated. Access receipts via **Invoices & Receipts** → **Receipts**. Receipts can be printed.

Voiding a receipt: If a payment was recorded in error, void the receipt (this also reverses the associated ledger entries).

1.6 Daily Tasks Checklist

Opening:

- ☐ Log in to the system
- ☐ Check today's appointments on the Calendar
- ☐ Confirm any Scheduled appointments that need confirmation

Throughout the day:

- ☐ Register new patients as they arrive
- ☐ Book appointments (scheduled and walk-in)
- ☐ Check in arriving patients
- ☐ Process payments at check-out

Closing:

- ☐ Reconcile cash drawer against receipts
- ☐ Verify no appointments are left in "Arrived" status
- ☐ Confirm next day's appointments if needed

Section 2: Dentist Guide

This section covers clinical workflows: starting a visit, documenting findings, performing procedures, writing prescriptions, and completing a visit.

2.1 Starting a Visit

From the appointment drawer: When a patient's status is **ARRIVED**, click "**Start Visit**".

The system creates a **Visit** record with a unique code (`VIS-YY-NNNN`) and loads the **Visit Dashboard**.

Visit Dashboard Layout

The visit dashboard shows:

- **Header strip:** Patient name, patient code, visit code, dentist name, appointment type, DOB, gender
- **Status badge:** CHECKED_IN / IN_PROGRESS / COMPLETED
- **Action buttons:** "Start Examination" (if ARRIVED), "Complete Visit" (if IN_PROGRESS)
- **Tabs:** Dental Chart, Treatment Plans, Exam/Notes, Appointments, Prescriptions, Imaging, Progress Report, Procedure Sessions, Patient Report

Visit statuses

Status	Meaning
ARRIVED	Patient checked in, visit record created
IN_PROGRESS	Dentist actively examining/treating
COMPLETED	All clinical work done
CANCELLED	Visit cancelled

2.2 Clinical Notes (SOAP)

Tab: Exam/Notes

The SOAP system is split into four sections. All fields **auto-save** as you type.

S — Subjective

What the patient tells you:

- Chief Complaint (CC) — the patient's main reason for visiting
- History of Present Illness (HPI) — onset, duration, severity, aggravating/relieving factors

O — Objective

Clinical examination findings:

- Intra-oral and extra-oral examination
- Radiographic observations
- Test results
- Any measurable or observable signs

A — Assessment

Your clinical judgment:

- Diagnosis / clinical impression
- Differential diagnoses
- ICD-10 codes (searchable dropdown)

P — Plan

Treatment plan:

- Procedures to perform
- Prescriptions needed
- Referrals
- Follow-up instructions

Completeness indicator: A progress bar at the top shows "X/4 fields filled". All four should be completed before finishing the visit.

Read-only mode: Once a visit is **COMPLETED**, clinical notes become read-only.

Findings & Recommendations

Field	Purpose
Clinical Findings	Detailed intra-oral and extra-oral findings
Patient Recommendations	Post-treatment instructions, dietary advice, hygiene recommendations, follow-up schedule

2.3 Vital Signs

Section within Exam/Notes tab

Six vital sign cards, each with a unit and normal range helper text:

Vital	Placeholder	Unit	Normal Range
Blood Pressure	120/80	mmHg	90–120 / 60–80
Pulse Rate	72	bpm	60–100
Temperature	36.5	°C	36–37.5
Weight	70	kg	—
Height	170	cm	—
SpO ₂	98	%	95–100

Values outside normal ranges are flagged visually. All vitals auto-save when entered.

2.4 Procedures

Tab: Treatment Plans or add directly from the visit dashboard.

Adding a Procedure

1. Search the **procedure catalog** (or browse by category)
2. Select the procedure (e.g., "Composite Filling — Posterior")
3. Assign **tooth numbers** (FDI notation) if applicable
4. Assign **surfaces** (Mesial, Occlusal, Distal, Buccal, Lingual) if applicable
5. The system calculates the cost based on the pricing model (Fixed / Per Tooth / Per Arch / Per Session)

6. Click **Add** to attach to the visit

Procedure pricing models

Model	Description
Fixed	One price per procedure regardless of quantity
Per Tooth	Price × number of teeth
Per Arch	Price per dental arch
Per Session	Price per treatment session
Per Bracket	Price per orthodontic bracket
Per Unit	Price per unit quantity

Procedure Categories

Consultation, Procedure, Diagnostic, Medication, Therapy, Surgical, Preventive, Administrative, Other

Tooth Chart (Dental Chart tab)

The interactive dental chart (odontogram) uses FDI numbering. Each tooth can be marked with:

- **Conditions:** Decayed, Missing, Filled, etc.
- **Status colours:** Healthy (green), Decayed (red), Filled (blue), Missing (grey), Treated (purple), Crown (amber), Implant (cyan)

Click a tooth to add chart entries (condition, existing work, planned treatment, completed procedure).

2.5 Prescriptions

Tab: Prescriptions

Creating a Prescription

1. Click "**New Prescription**"
2. Search the **drug catalog** by name

3. For each drug, set:
 - **Dosage** (e.g., "500mg")
 - **Frequency** (e.g., "Twice daily", "Every 8 hours")
 - **Duration** (e.g., "7 days")
 - **Quantity** (e.g., "14 tablets")
 - **Refills** (if applicable)
4. The system generates a prescription code (`RX-YY-NNNN`)
5. **Print** or send to the pharmacy

Drug Catalog

Accessible via **Medicines** → **Drugs**. Drugs are categorised (Antibiotics, Analgesics, Anaesthetics, etc.) and linked to inventory stock levels.

Important: Prescriptions check inventory availability. If a drug is out of stock, the system will alert you.

2.6 Imaging & Lab Orders

Imaging

Tab: Imaging

Upload radiographic images directly to the patient's record:

Field	Details
Image Type	Periapical, Bitewing, Panoramic, CBCT, Cephalometric, Intraoral Photo, Extraoral Photo
Stage	Pre-treatment, Post-treatment, Review, Emergency
Classification	Normal, Abnormal, Pathological

All images are stored in the local file system and linked to the visit. Previous imaging is available for comparison.

Lab Orders

Tab: Create lab test orders linked to the visit. Each order tracks its status (Pending → In Progress → Completed). Results can be attached once returned.

2.7 Completing a Visit

When all clinical work is done:

1. Verify all SOAP fields are filled
2. Confirm all procedures are added
3. Click "**Complete Visit**"
 - Visit status → **COMPLETED**
 - `completedAt` timestamp is recorded
 - Appointment status → **COMPLETED**
 - `actualEndAt` timestamp is recorded
4. Optional: Set a **follow-up date** and notes
 - This will suggest a follow-up appointment when the receptionist views the patient record

After completion: The visit data is locked for editing. Ledger entries are generated for each procedure, ready for billing by reception.

Section 3: Manager Guide

This section covers oversight functions: monitoring KPIs, generating reports, financial management, staff administration, and system configuration.

3.1 Dashboard Overview

Navigation: Sidebar → **Dashboard**

The dashboard provides a real-time snapshot of clinic operations:

KPI	What it shows
Today's Appointments	Total appointments scheduled for today
Revenue (Today)	Total payments collected today
Active Patients	Total registered and active patients

KPI	What it shows
Appointment Breakdown	Scheduled / Confirmed / Arrived / In Progress / Completed counts

Use the dashboard as your morning check-in to see what the day looks like.

3.2 Reports & Analytics

Navigation: Sidebar → **Reports**

Available Reports

Report	Description
Medical Report	Clinical outcomes, treatments performed
Patients Report	Registration trends (daily/weekly/monthly), demographics (age/gender), insurance breakdown, city distribution, month-over-month growth
Sales & Receipts	Revenue by dentist, by procedure, by period, by payment method
Expenses & Payments	Operational costs, supplier payments, expense categories
Inventory Report	Stock levels, valuation, usage trends, waste
General Ledger	Chart of accounts, journal entries, trial balance
Audit Log	All system state changes (who did what and when)

Patient Reports Detail

The **Patients Report** page (</patients/reports>) provides:

- **Registration Trend** chart — new patients over time
- **Age/Gender Distribution** — demographics pie/bar charts
- **Insurance Breakdown** — how many patients have insurance vs. not
- **City Distribution** — geographic spread
- **Growth Rate** — percentage change in registrations month-over-month

Exporting Reports

Reports can be **printed** or **exported** (where implemented). Financial reports are available in PDF and CSV formats.

3.3 Financial Management

Invoice Lifecycle

Status	Meaning
DRAFT	Invoice is being built. Not yet reflected in accounting. Can be edited freely.
POSTED	Invoice activated. Ledger entries are created. Affects Accounts Receivable and Revenue.
VOID	Invoice cancelled. Must include a reason. Voiding reverses ledger entries and voids any associated receipts.

Creating an Invoice

1. Open a visit → click **Bills** icon
2. Click **"Add Items"** to include procedures, drugs, or manual line items
3. Adjust quantities, discounts, and set tax percentage as needed
4. Click **"Post Invoice"** to activate it
 - This creates the double-entry journal: DR Accounts Receivable, CR Revenue
 - Any patient deposits are applied automatically

Payment Statuses

Status	Badge Colour
Unpaid	Slate
Partially Paid	Amber
Paid	Green

Multi-currency

The system supports **UGX** (base) and **USD** (and other currencies). Each invoice has a currency selector. Exchange rates are tracked at the time of payment and recorded on the receipt for audit purposes.

Discounts

Two types available:

- **Fixed amount** — subtract a specific value
- **Percentage** — subtract a % of the subtotal

General Ledger

Navigation: Reports → **General Ledger**

The system uses double-entry accounting. Key accounts:

Account	Type	Purpose
Accounts Receivable (A/R)	Asset	Tracks what patients owe
Revenue (Treatment)	Income	Income from procedures
Patient Deposits	Liability	Prepayments by patients
Tax Payable	Liability	VAT/sales tax collected
Cash/Bank Accounts	Asset	Physical money locations

Closing periods: At the end of each day/week/month, reconcile accounts using the **Account Period** system. This locks transactions for the period and produces a summary.

Expenses

Navigation: Sidebar → **Expenses**

Track operational costs:

- Dynamic expense categories (rent, utilities, supplies, etc.)
- Link expenses to suppliers
- Post to General Ledger automatically

Fixed Assets

Navigation: Sidebar → **Expenses** → **(Fixed Assets)**

Track dental equipment, computers, furniture with depreciation schedules.

3.4 Staff Management

Navigation: Sidebar → **Staff**

Staff Records

Each staff member has:

- Personal details (name, contact, role)
- Linked **User account** for system login
- **Role-based permissions**

Roles

Role	Typical Access
Super Admin	Full system access, user management
Admin	Full access (practice owner / general manager)
Dentist	Clinical: visits, SOAP, procedures, prescriptions, treatment plans, dental chart, patient records (read/write)
Nurse	Assist with visits, vitals, stock usage; limited billing
Receptionist	Patient registration, appointments, check-in/out, payment collection
Pharmacist	Drug management, dispensing, pharmacy sales
Lab Technician	Lab orders, imaging records

Dentist Schedules

Navigation: Staff → **Dentist profile** → **Schedule**

Set each dentist's working hours and days. The appointment system uses this to determine available time slots.

Performance Notes

Navigation: Staff → **Dentist profile** → **Performance**

Record performance reviews, KPIs, and notes.

3.5 System Settings & Audit

Clinic Settings

Navigation: Sidebar → **Settings** (gear icon)

Configure:

- Clinic name and branding
- Default appointment duration
- Tax rate
- Currency settings
- Receipt/invoice numbering prefix

Audit Log

Navigation: Reports → **Audit Log**

Every state change in the system is recorded:

- Who made the change
- What was changed (old value → new value)
- When it happened
- IP address / session info

This is append-only and cannot be modified. Use it for compliance, troubleshooting, and dispute resolution.

Notifications

The notification bell (top header) shows real-time alerts for:

- Appointment status changes
- Billing events
- Inventory low-stock warnings

Click a notification to navigate to the relevant record.

Appendix

A: Status Flow Diagrams

Appointment Status Lifecycle

Invoice Lifecycle

Visit Status Lifecycle

B: Glossary of Terms

Term	Definition
A/R	Accounts Receivable — money owed by patients
CC	Chief Complaint — patient's primary reason for visit
Chart Entry	A record on the dental odontogram (per-tooth data)
Cuid	Collision-resistant unique identifier used for database IDs
FDI Notation	Two-digit tooth numbering system (11–18, 21–28, etc.)
GL	General Ledger — the clinic's chart of accounts
HPI	History of Present Illness
ICD-10	International Classification of Diseases, 10th revision
Invoice	Bill for services rendered
Ledger Entry	Individual financial transaction on a patient's account
Odontogram	Dental chart showing all teeth and their conditions
SOAP	Subjective, Objective, Assessment, Plan — clinical documentation format
SpO₂	Blood oxygen saturation level
Treatment Plan	Grouped procedures for ongoing/multi-visit care
Visit	A single clinical encounter from check-in to check-out

End of manual. For support, contact your system administrator.
